

GloWarm

Candle Light / Mini Heater 4 & 8 Hour Tea Light Candle Construction

Instruction Guide.

You must remove the terracotta pot to remove ALL packaging prior to using.

Unscrew the main perforated top cover from by holding the base firmly and twisting the top in an anti-clockwise direction.

WARNING - Place **only 4 tea-light or less** in the candle tray at one time,

DO NOT put 8 hour tea-light candles in a 4 hour Glowarm any modifications made to the glowarm may cause overheating resulting in a risk of fire.

Re-attach the top cover by screwing clockwise on to the base tray.

DO NOT over tighten, (top should lightly touch tray).

Light the tea-light candles via the access point in cover, rotate base to light each candle in series, take care when rotating the cover.

The Glowarm can either be placed on a flat heat resistant surface or hung using the handle, always use in a well-ventilated area, Keep away from flammable materials / liquids when in use, the Glowarm cover generates a significant amount of heat (up to 117* C) and will cause all parts of the Glowarm to become very warm to touch.

When finished using the Glowarm, extinguish all candles, allow cooling before moving.

The handle may remain warm to the touch, caution must be taken when handling. Should the Glowarm fall over or tip too far to one side, the candles remain inside but hot wax will spill into the candle tray, when replacing candles allow to cool, remove any spillages inside the tray before replacing with new tea lights candles.

Glowarms can be used as either a mini heater or by removing the terracotta pot a shimmering light source, other models incorporate an additional thermoelectric fan for power free air circulation.

WARNING - Remove internal terracotta pot when using scented candles.

Keep away from all flammable materials / liquids. Keep out of reach of children, animals and pets, candle base will get warm, place on a heat resistant surface. If using as a heater take note of the trays air gap of 4 to 6mm.

DO NOT leave unattended when in use, use correct tea-light candles for corresponding 4 or 8 hour Glowarm models.

CAUTION - Use only Quality (paraffin based only) replacement Tea light candles, the Glowarm has been tried and tested using SPAAS tea light candles available from on-line / internet, we take no responsibility for the choice of candles you choose to use, **DO NOT** modify the Glowarm in any way, the limiting washer is there to limit the candle size for safety.

To clean any spilled wax from the candle tray, use a hot hairdryer or similar to melt the wax then wipe with a clean cloth.

By using this product you have agreed to adhere to these user guidelines.
