

# GloWarm

## Tea Light / Mini Fan Heater – 8 Hour Construction

# Instruction Guide.

**You must remove the terracotta pot to remove ALL packaging prior to using.** Prior to use, attach the fan blade using the Allen key provided.

To use unscrew the main perforated top cover from the base by holding the base firmly and twisting the top in an anti-clockwise direction.

Place **only 4 tea-light or less** in the candle tray at one time,

Re-attach the top cover by screwing clockwise on to the base tray.

**DO NOT** over tighten, (top should lightly touch tray).

Light the tea-light candles via the access point in cover, rotate base to light each candle in series. take care when moving.

When lit and securely fitted together the Glow Warm can either be placed on a flat heat resistant surface or can be hung using the handle, use in a well-ventilated and safe area, keep well away from any flammable materials when in use.

The Glowarm cover generates a significant amount of heat and will cause all parts of the Glowarm to become very warm.

When finished using the Glow Warm, blow the candles out individually via the perforation holes in the cover, allow cooling before moving.

The handle may remain warm to the touch, caution must be taken when handling. Should the Glowarm fall over or tip too far to one side, the candles remain inside the tray but hot wax will spill into the candle tray, when replacing candles allow to cool then remove any spillages inside the tray before re-lighting new.

**The Glowarm Fan terracotta pot must not be removed when using, if removed this could damage the fans operating peltier module.**

**Keep away from all flammable materials, fluids (minimum 2 meters).**

**Keep out of reach of children, animals and pets, Candle base will get very warm, place on a heat resistant surface.**

**Prior to using take note of the trays air gap (shown in diagram). Never leave lit candle unattended.**

**Use only Quality (paraffin based only) replacement tea light candles, this product has been tested with SPAA tea light candles, these are readily available from the internet, Please note we only produce the Glowarm unit and not the candles. We can take no responsibility for the choice of candles you choose to use. DO NOT modify this product in any way.**

**To clean any spilled wax from the candle tray, use a hot hairdryer or similar to melt the wax then wipe with a clean cloth, There are no user serviceable parts on the glowarm fan.**

**Replacement terracotta pots are available from our website.**
